Dr. Cantu's *MicroHealing Training & Coaching*SM was developed over 30 years and cannot be found in the device owners manual. This is the fastest way for doctors and patients to learn how to individualize treatment for better results.

HERE'S WHY IT WORKS

When Brain and Body function become dysregulated, healing is needed for symptoms to be reversed longterm. The proper healing microcurrent waveform with a frequency that matches our cells low electrical output creates *Harmonic Resonance Healing*SM.

Electricity is the Currency the Brain and Body uses for Communication and Function. Our device helps heal and improve brain function so that symptoms improve naturally.

For Stress, Anxiety, Depression, and insomnia that have not improved with conventional medical approaches or medication, we recommend Cranial Electrotherapy Healing Microcurrent Therapy for home use. With nearly 3 decades of experience we can help you with everything you need. We also offer individualized training and coaching to help you get quick, long-lasting relief from your Alpha Stim AID device at home. We can write you the necessary prescription required to purchase your device.
